PROTECT YOUR LIFE WITH PROTECTOR

PROTECTOR[®]
FIRESAFETY INDIA PVT. LTD.

Protector FireSafety India Pvt. Ltd. is a leading manufacturer, dealer and distributor of best in class personal protective equipment, since 1993. Our Director **Mr. Jignesh Shah** believes in ensuring that our customers have effective health & safety systems in place to protect employees, generate customer confidence and enhance business reputation.

We are not just a company selling safety products, we are your safety consultant.

We have wide range of products comprising of Personal Protective Equipment, Fire Safety Systems, Road Safety, Industrial Safety, Marine Safety, Lifting Material, Lock Out-Tag Out & Signage. We have a dedicated team looking after Safety Training and Audit. Our company is a single window providing solution to all your safety issues. We have mastered ourselves at innovation in business and delivering exceptional quality at reasonable price giving highest level of satisfaction our valued customers.

We are now a 31 years old company having ISO 9001 certification. We are constantly innovating and bringing new ideas to our business. We have an established network and system of customized design of signage, production and installation under the brand name PROSIGN. We have more than 12000 ready to use signages bundles on our website www.prosign.co.in managed by our in-house graphic department under the leadership of our director **Mrs. Janki Shah**. We also have a dedicated department for Road Safety turnkey projects. We believe in sustainable growth which we achieve through various social activities under our CSR program through an NGO, 'Act Of Kindness' founded by our director **Mr. Jignesh Shah**.

We are dealing in multiple brands displayed at our in-house showroom and available for online buying on our website www.protectorfiresafety.com

Vision

To achieve highest peak of business through exceptional values, unsurpassed professional approach, best service to customers, friendly work culture and innovative ideas.

Mission

- 1) To provide quality products
- 2) To develop effective safety systems
- 3) To identify, manage and reduce risk
- 4) To comply with the needs of the customer
- 5) To build trust and long lasting relationship

PIPE LINE COLOR CODE IDENTIFICATION BOARD

(2422)

PIPE LINES COLOUR CODE IDENTIFICATION

पाइप लाईनों की पहचान के लिए रंग - संकेत

WHY COLOUR CODING ON PIPELINES?

- ◆ To reduce the possible safety hazards
- ◆ To reduce the possibility of mistakes in identification
- ◆ To reduce the accident associated with wrong identification of pipeline during emergency situation

PIPE COLOUR CODING STANDARDS:-

- ◆ IS2379: 1990 - Pipe lines identification colour code
- ◆ BS1710 - Specification of identification of Pipelines and services
- ◆ ASME A13.1- Scheme for the identification of piping system

| PIPE LINE GROUND COLOR | | |

WHAT IS SAFE LOTO?

WHAT IS LOTO !
SPECIFIC PRACTICES AND PROCEDURES TO SAFEGUARD EMPLOYEES FROM THE RELEASE OF HAZARDOUS ENERGY DURING SERVICE OR MAINTENANCE ACTIVITY.

WHY IS LOTO IMPORTANT:
UNEXPECTED STARTUP OF EQUIPMENT/MACHINERIES DURING SERVICE MAINTENANCE WORK CAN RESULT IN SERVE INJURY OR EVEN DEATH. STUDIES HAVE SHOWN THAT 30% OF INJURIES OCCURRING DURING SERVICE WORK ARE THE BEST RESULT OF SOMEONE ELSE STARTING UP THE EQUIPMENT. DON'T BE RESPONSIBLE FOR INJURING A FELLOW EMPLOYEE.

WHY IS LOTO AUTHORIZED EMPLOYEE:
A PERSON WHO LOCKOUT OR TAGOUT MACHINES OR EQUIPMENTS IN ORDER TO PERFORM SERVICING OR MAINTENANCE ON THAT MACHINE OR EQUIPMEEN. AN AFFECTED EMPLOYEE BECOMES AN AUTHORIZED EMPLOYEE WHEN THAT EMPLOYEE'S DUTIES INCLUDE PERFORMING SERVICING OR MAINTENANCE COVERED UNDER THIS SECTION.

TYPES OF LOTO APPLICATION:
1. ELECTRICAL 2. MECHANICAL 3. CHEMICAL
4. HYDRAULIC 5. PNEUMATIC 6. THERMAL
7. OTHER SOURCES OF ENERGY

LOCKOUT STEPS:
1. DETERMINE RESPONSIBILITIES- JOB PLAN
2. KNOW THE TYPES AND MAGNITUDE OF HAZARDO ENERGY.
3. SHUT DOWN TURN OFF THE EQUIPMENT.
4. ISOLATE THE EQUIPMENT FROM HAZARDOUS ENR
5. APPLY THE LOCKOUT- DEVICES/LOCKS/TAG
6. RELIEVE STORED ENERGY
7. VERIFY ISOLATION- TRY TO START THE EQUIPMENT

RELEASE FROM LOCKOUT:
1. RELEASE NON-ESSENTIAL MATERIALS
2. MAKE SURE ALL EMPLOYEES ARE SAFETY POSITIONED AND NOTIFIED.
3. RELIVE LOCKS AND DEVICES

FIRE ACTION

- OPERATE NEAREST FIRE ALARM.
- CALL FIRE BRIDGE IMMEDIATELY ON : _____
- LEAVE BUILDING BY NEAREST EXIT.
- REPORT TO ASSEMBLY POINT : _____

DO NOT USE LIFTS

Electric Shock

1. DANGER
Electric shock can be fatal. It can also cause serious injury and long-term health problems. It can also cause cardiac arrest and death.

2. RESPONSE
If you or someone else has been shocked, call for medical help immediately. Do not touch the person if they are still in contact with the electricity. If you are the one who has been shocked, do not try to move yourself. Stay where you are until help arrives.

3. FIRST AID MEASURES
If you are the one who has been shocked, do not touch yourself or anyone else. If you are helping someone else, do not touch them if they are still in contact with the electricity. If you are helping someone else who is unconscious, do not touch them if they are still in contact with the electricity. If you are helping someone else who is unconscious, do not touch them if they are still in contact with the electricity.

4. GETTING HELP
Call for medical help immediately. Do not touch the person if they are still in contact with the electricity. If you are the one who has been shocked, do not try to move yourself. Stay where you are until help arrives.

5. UNCONSCIOUS - NOT BREATHING
If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

6. OTHER ISSUES
If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

PCH021

ELECTRICAL SAFETY

ELECTRICITY CAN KILL YOU
Electricity can kill you. It can also cause serious injury and long-term health problems. It can also cause cardiac arrest and death.

WHAT DO THE REGULATIONS REQUIRE
The Electricity Safety, Quality and Interference Act 2003 (ESQIA) requires that all electrical work be done in a safe and sound manner. This means that all electrical work must be done in accordance with the relevant standards and regulations.

ASSESSING THE RISK
Health and safety risk assessment should be carried out before any electrical work is carried out. This should take into account the nature of the work, the environment, and the skills and experience of the person carrying out the work.

REDUCING THE RISK FOR EMPLOYERS
Employers should ensure that all electrical work is done in a safe and sound manner. This means that all electrical work must be done in accordance with the relevant standards and regulations.

REDUCING THE RISKS FOR EMPLOYEES
Employees should always wear appropriate personal protective equipment (PPE) when carrying out electrical work. This should include safety glasses, gloves, and footwear.

PCH022

विद्युतीनी आंखको लागे त्वाये प्राथमिक सारस्वार

FIRST AID IN ELECTRIC SHOCK

1. Do not touch the person if they are still in contact with the electricity. Call for medical help immediately.

2. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

3. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

4. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

5. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

6. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

PCH023

Snake Bite Management

Place a clean, dry cloth over the bite site. Do not wash or remove the skin as it may assist in later identification.

Immediately apply a firm pressure bandage over the bite site. Then apply a further pressure bandage commencing at the base of the bitten limb and extending upward covering as much of the limb as possible.

Bandage should be firm. Keep the body and limb as still as possible. Do not elevate the limb.

After applying the pressure bandage immobilise the limb by banding a splint to it (e.g. a piece of timber or other leg etc). If the bite is on the forearm put the splinted forearm in a sling.

Casualty must stay calm, keep limb still and wait for medical assistance.

SEEK URGENT MEDICAL ASSISTANCE
Leave the bandage in place until medical aid is reached.
Check circulation at regular intervals.

PCH016

Life Saving Instruction जिवन बचाव सुचना

Fire Fighting आगथी सुरक्षा

Equipments to the fight fire: Blanket, Water, Fire Extinguishers, Sand bucket and bags.

When a building catches fire: 1. Stay calm. 2. Place the fire alarm. 3. Use the fire extinguisher. 4. Use the fire escape.

If a person catches fire: 1. Stop. 2. Drop. 3. Roll. 4. Cover.

Instructions to use Fire Extinguisher: 1. Pull the pin. 2. Aim at the base of the fire. 3. Squeeze the handle. 4. Sweep from side to side.

PCH026

BURNS & SCALDS

FIRST AID ESSENTIALS - FIRES
1. Stop. 2. Drop. 3. Roll. 4. Cover.

SEVERE BURNS & SCALDS

विद्युती का शक्ति चले पर तत्कालीक सारस्वार करने का तरीका

First Aid Treatment For Electric Shock

1. Do not touch the person if they are still in contact with the electricity. Call for medical help immediately.

2. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

3. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

4. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

5. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

6. If you are helping someone else who is unconscious and not breathing, do not touch them if they are still in contact with the electricity.

PCH024

LABORATORY SAFETY

LABORATORY DRESS
Wear a lab coat and safety glasses. Do not wear jewelry or loose clothing.

HOUSEKEEPING
Keep the laboratory clean and free of clutter. Dispose of waste properly.

CHEMICAL SPILLS
If you spill a chemical, stop work immediately. Notify your supervisor. Follow the spill response procedure.

TRANSFERRING LIQUIDS
Use proper technique when transferring liquids. Do not use your mouth to pipette.

LABELING CHEMICALS
Label all containers with the name of the chemical, concentration, and date.

EYE WASH
Use the eye wash station immediately if you get a chemical in your eyes.

WATER REACTIVE METALS
Do not touch water reactive metals. Store them properly.

FIRE EXTINGUISHERS
Know the location and use of fire extinguishers.

HAZARDOUS VAPORS
Use fume hoods for work that produces hazardous vapors.

WASTE CONTAINERS
Use the correct waste container for each type of waste.

SAFETY RULES
Follow all safety rules and regulations. Do not drink or eat in the laboratory.
