A floor marking colour code

With the right colours in the right places, you can easily keep workers on the right path, identify equipment and storage areas, hazardous flooring and forklift traffic and more.

If no company colour coding standard is in place, we suggest this useful guideline to establish floor marking consistency in your workplace. No matter which colour code you decide on, it is always a good idea to train

Colour		Area
Yellow / White		Aisle ways, traffic lanes, work cells and traffic routes for vehicles
Blue, Green and/or Black		Materials and components, including raw materials, work-in-progress and finished goods
Orange		Materials or products held for inspection
Red		Defects, scrap, rework and red tag areas
Photoluminescent		Steps and perimeter demarcation to identify egress routes in a lights-out emergency
Black and White		Areas to be kept clear for operational purposes
Black and Yellow/Red and White		Areas that may expose employees to special physical or health hazards, risk of colliding with obstacles, of falling or of objects falling.

➔ NATURAL GAS ➔

PIPE MARKER COLOR RECOMMENDATION

Guidelines taken from ASME (ANSI) Standard A13.1 - 2007

CLASSIFICATION	EXAMPLE	COLOUR SCHEME
Potable, Cooling, Boiler Feed & Other Waters	Waste water	WHITE ON GREEN
Flammable Fluids	Gas	BLACK ON YELLOW
Compressed Air	Air 100 psi	WHITE ON BLUE
Fire-quenching Fluids	Halon	WHITE ON RED
Toxic/Corrosive Fluids	Hcl	BLACK ON ORANGE
Combustion Fluids	Vapor	WHITE ON BROWN
Acids & Alkalis	Defined by user	WHITE ON PURPLE
Non-Flammable Gas		WHITE ON GRAY
Air Ventilation System		BLACK ON WHITE
Waste Media		WHITE ON BLACK

Note:- You can also customize the design and layout to match your brand's aesthetics
