

# PS200

Portable 4 Gas Monitor

# Description

The PS200 Series combines quality, ruggedness and advanced technology in a user friendly, portable gas monitor. It is compact, lightweight, water resistant, extremely robust, and is certified to multiple international and regional standards.

The PS200 can measure any combination of LEL, O2, CO and H2S making it suitable for a wide range of personal monitoring and confined space applications.

In addition to extensive datalogging capabilities, the PS200 is available with an optional internal pump and an extensive range of accessories to meet a wide variety of user applications.

Importantly, the PS200 has been designed to enable easier user maintenance which includes a fully automatic calibration station to simplify product compliance.

# **Features**

- Simple 2-button operation
- Any combination of LEL/ $O_2/CO/H_2S$
- Audible, visual and vibrating alarms
- Fully certified
- Internal pump (optional)
- Datalogging capabilities (up to 6 months)
- Run-time up to 80 hours, when using low power LEL sensor (optional)
- Configurable operations
- Quick field calibration (optional)
- Lightweight
- Sensor integrity checking
- Robust construction
- Ease of maintenance

# **Technical Specification**

| Size:                    | 121 x 59 x 32mm (4.8″ x 2.3″ x 1.3″)   |
|--------------------------|--|
| Weight:                  | 230g (8oz) with pump 215g (7.6oz) without pump   |
| Temperature:             | -20°C to +50°C (-40°F to 122°F)  |
| Humidity:                | 0 to 95% R.H non-condensing  |
| Alarms:                  | Highly visible flashing LED, piercing >90dB<br>audible, vibrating  |
| Display:                 | Green and red LCD backlight display  |
| Datalogging              | Timed: Minimum of 6 months timed datalogging*<br>Session: Minimum of 360 logs<br>Calibration: Minimum of 8 calibration logs<br>Bump: Minimum of 360 logs   |
| Battery:                 | Lithium Ion rechargeable battery<br>Run Time: Up to **80 / 14 hrs (diffusion)<br>Up to **20 / 8 hrs (pumped)<br>Charging Time < 4 hrs  |
| Enclosure:               | High impact rubberized polycarbonate case  |
| Drop Test:               | 3m (10 ft)   |
| IP Rating:               | IP67   |
| Response Times<br>(T90): | LEL = 15 secs (IEC 60079-29-1)<br>$O_2 = 12$ secs (BSEN 50104)<br>CO < 20 secs<br>$H_2S < 20$ secs   |

| Warranty:                | 2 years standard warranty against faulty goods or work-<br>manship from date of shipment from Teledyne. Consumable<br>parts are not included.<br>Warranty covers monitor assembly, power supply, and<br>sensors.   |

\* This is based on a gas event every 1-hour during a typical 8-hour shift with a datalog interval of every 1 minute.

\*\* Low Power LEL sensor

\*\*\* Only applicable to marine variants with "M" prefix.

# **Features**

# **Automatic Bump Testing and Calibration**

To complement the Personal Surveyor product line, Teledyne has developed a compact, robust and easy to use Auto Bump & Calibration Station that can provide full bump and calibration options. Data transfer is facilitated using a USB memory stick with Standalone software that is simple to set up and customise based on end users' specifications. Standalone, PC, and ethernet versions are available.

Coloured 'rubber boot' for multi-site or multi-application working (7 colours available)

# Auto Bump & Calibration Station technical specification

| Size:               | 200 x 140 x 135mm (7.9" x 5.5" x 5.3")                          |
|---------------------|---|
| Weight:             | 1.2kg (43oz)  |
| Interfaces:         | Standalone / USB / Ethernet                                     |
| LED<br>Indicators:  | Power (Green) / Testing (Yellow) / Pass (Green) /<br>Fail (Red) |
| Testing Time:       | Bump Test 60 secs<br>Calibration Test 90 secs                   |
| Data Storage:       | up to 5000 Bump & Calibration results                           |
| Power Supply:       | 12V dc, 2A  |
| Operating Temperatu | -10°C to 40°C<br>re: (14°F to 104°F)                            |
| Gas Ports:          | 3 (Air, Combi Gas & Exhaust)                                    |

# Standalone

By adding the Auto Bump & Calibration Station to your PS200 package, test data can be easily retrieved using specific software in a user-friendly time logged format. This gives you the ability to create and print your personalised calibration certificate.

#### PC

Allows easy configuration (bump test or calibration) of Auto Bump & Calibration Station and allows all results to be automatically stored to a database on the PC. The stored results can be easily viewed and calibration certificates produced. The history of all results can be easily viewed and reports of instruments can be easily compiled.

#### Ethernet

Same as PC except multiple units can be connected to a network allowing one PC to control and receive data.

#### **Sensor specification**

| Gas              | Ranges                  | Increments       | Sensor Type     |
|------------------|-------------------------|------------------|-----------------|
| LEL              | 0-100% LEL              | 1% LEL           | Catalytic Bead  |
| O <sub>2</sub>   | 0-25%                   | 0.1%             | Electrochemical |
| СО               | 0-1000 ppm              | 1 ppm            | Electrochemical |
| H <sub>2</sub> S | 0-9.9 ppm<br>10-100 ppm | 0.1 ppm<br>1 ppm | Electrochemical |

## **Combustible sensor options**

| LEL<br>Sensor        | Benefit  | Gases Detected   | Certification<br>Gas Groups | Division<br>/ Zone                     |
|----------------------|--|--|-----------------------------|--|
| Standard<br>Filtered | Detects most<br>combustible<br>gases                                 | C1 – C8 Hydrocarbons<br>Includes, but not limited<br>to: Methane, Ethane,<br>Propane, Butane, Pentane,<br>Hexane, Heptane, Octane,<br>Hydrogen | IIC<br>A,B,C and D          | Class I,<br>Div. 1,2<br>Zones 1,2      |
